

Solar System Proposal

Proposal ID: PV-20260519-001

Date: 19.05.2026

Valid until: 18.06.2026

Prepared for: Marko Macek

Email: marko@example.com

Recommended System

3.6 kWp

System Power

Optimal for your consumption

8x 450Wp

Panel Count

High-efficiency panels

4104 kWh

Annual Production

Based on Trnava region

Roof orientation:

South

Location:

Trnava

Self-consumption ratio:

70%

Financial Overview

Item	Amount
Photovoltaic system	3,960 EUR
Battery storage (4 kWh)	2,000 EUR
TOTAL PRICE	5,960 EUR

Return on Investment

517 EUR

Annual Savings

11.5 years

Payback Period

6,160 EUR

25-Year Net Profit

Estimate confidence: 100%
